Cranleigh Fountain Square planter repairs

Start date: 21 August 2018

Repair works have been initiated due to the deteriorating condition of the brickwork on each of the three planters.

The work consists of replacing the top run of bricks on each of the planters with a more resilient brick. For the duration of the work there will be fencing up around the planters to prevent people entering the site.

It is expected that the work will take approximately five working days.

Care should be taken around Fountain Square during this period.
