

Memorial Safety Policy

1.0 Introduction

The intention of this policy is to set out how Cranleigh Parish Council will undertake the management of any significant risks from memorials, within its cemetery in a sensible and appropriate manner. However since the general risk can be deemed low it is not the intention of this policy to cause any unnecessary concern, only to provide guidance to any questions that may arise by any concerned party and to provide an assurance that memorials are properly managed.

Cranleigh Parish Council is duty bound under the Management of Health and Safety at Work Regulations Act to assess reasonably foreseeable risks from its activities and to put in place control measures that will reduce the risks – so far as is reasonably practicable.

It is the Parish Council's intention to follow the latest guidance from the Institute of Cemetery and Crematorium Management (ICCM) on memorial safety and to take appropriate action to any memorial deemed unsafe within the cemetery.

Memorials within the cemetery which after testing are found to be unsafe, dangerous or in poor condition will be cordoned off. Every effort will be made by the Parish Council to contact any concerned parties before any further action is taken. (Priority will always be given to making safe, higher risk memorials)

2.0 Responsibility for the maintenance

The public has the right to apply to erect a memorial under the Local Authorities Cemeteries Order 1977 (LACO) and will have to submit an application by person or via a contracted memorial mason.

Local Authorities Cemeteries Order (LACO) 1977 section 10 (1c) Provides the right to place and maintain a memorial in a cemetery and therefore ownership of any individual memorial rests with the owner of the rights of burial, or their heirs – and other persons granted the right to place and maintain a memorial on a grave space within the Parish.

Although the memorial owner has a responsibility for ensuring their property is installed and maintained in a safe manner the Parish Council has overall responsibility for Health and Safety. This includes a duty of care to ensure all risks are safely managed.

3.0 Diocese and Consecrated Ground

A faculty is not required for the day to day management of the cemetery.

4.0 Memorial Inspection

At least 28 days' notice will be given prior to the start of memorial safety inspections.

A public notice will be issued in the form of a press release, notification will also be displayed at the cemetery and on all Parish notice boards.

Notices will detail the intent of the Parish Council and the dates of the inspections and information on how to raise any objections with the Parish Council.

All grave owners and relatives who wish to be informed of the details of the inspections can request this information from the Parish Council.

5.0 Testing Memorials

Cranleigh Parish Council's memorial safety team will carry out a visual check and hand test on all memorials in the cemetery on a 5 year cycle. The visual check is looking to see if there are any signs of cracking, whether it is leaning and whether the joints are intact. The hand test involves standing to one side of the memorial and applying firm but steady pressure by hand.

Training will be provided for all personnel carrying out the inspections /testing and make safe work.

The hand test will be used to determine if or to what degree the memorial is unstable.

The grave owner or relatives of the deceased can request to witness the test being carried out.

6.0 Risk Controls

Different identified levels of risk will result in the following action.

- Low risk memorials – Inspect on 5 year cycle.
- Medium risk memorials – warning sign, stake or cordon off until further action can be taken.
- High risk memorials – warning sign, cordon off, part bury or lay flat until further action can be taken.
- Memorials will only be laid flat when action is necessary to prevent immediate risk to health and safety.

Memorials over 2.5m will be visually inspected and risk assessed. If any further investigations are required they will be undertaken by a qualified Structural Engineer.

7.0 Records Relating to the Inspection of Memorials

All memorials will be inspected on a 5 year cycle and a record kept of the inspection. Records will include information that will assist in locating memorials in future inspections, information on the visual and hand tests, an assessment of the priority and any action taken. Digital photographs will also be taken as a permanent record.

8.0 The Responsibility for Making Safe Memorials

Cranleigh Parish Council has powers under the provisions of the LACO 1977 section 3 2(b) to make safe or remove any memorials found to be unsafe during a safety inspection.

Every reasonable effort will be made however to contact the Grave owners or their heirs – at - law.

A letter will be issued to the last known address of the grave owner and a notice attached to the unsafe memorial.

28 days notification will be given for any intended action to any memorial, unless it is considered in immediate danger. If all attempts to contact the grave owner fail then Cranleigh Parish Council has the right to remove or take such steps as to make safe the hazard. This will also be the case for memorials where the grave owner or their heirs-at-law have been contactable but were either unwilling or unable to ensure a repair by a registered stone mason.

Options available to grave owners who can be traced may be discussed with the Parish Council.

Where contact has been lost with grave owners or their heirs-at-law, the council has responsibility under LACO 1977 and HSWA 1974 to manage the cemetery to maintain safety.

9.0 Memorials of Interest

Memorials of historical or social importance within the cemetery that are deemed to present a risk of injury to people visiting or working with in those burial grounds will take priority over other works. In these cases should relatives be traced in the future they will be asked to contribute to the cost of any previous repairs undertaken by Cranleigh Parish Council.

10.0 Repairing Existing and Installing New Memorials

Only accredited memorial masons will be allowed to work within Cranleigh cemetery.

Membership of a national registration scheme, such as the British Register of Accredited Memorial Masons (BRAMM) or equivalent will be required. Memorial Masons should also meet the following criteria:

- (1) Have satisfactory and proven experience.
- (2) Provide all memorial construction details.
- (3) Provide risk assessments and safe methods of working
- (4) Provide minimum public liability insurance of £1million
- (5) Provide all grave owners with a guarantee of materials and workmanship for a minimum of 7 years.
- (6) Advise the Parish Council when they will be erecting or repairing a memorial to allow random inspections.

All fixings must comply with the National Association of Memorial Masons (NAMM) Code of Working Practice and BS8415.

The same standards of workmanship will apply to memorials that are removed and re-fixed by grave owners.

November 2018.

Policy Review Date: April 2019

Letters and Signs for Public Attention

Dear Sir or Madam

You may be aware that Cranleigh Parish Council is working on a memorial safety program within its cemetery. As a burial authority, the Parish Council has a responsibility under the Local Authorities Cemeteries Order 1977 and the Health and Safety at Work Act 1974 to ensure that risks within our cemetery are properly managed.

In accordance with this program, we write to inform you that your memorial will be subject to a safety inspection on or after (Inspect Ref Date) to determine if it constitutes a potential hazard to yourself and other visitors.

Cranleigh Parish Council would like to stress that the test involved is totally non-invasive and merely requires a 'hand test'. No mechanical equipment will be used. Memorials will only be laid flat when action is necessary to prevent immediate risk to health and safety.

Should your memorial fail the inspection it will be made safe temporarily using a stake and strapping, with a warning notice attached to it. We will then write to you as the person responsible for the memorial, asking you to ensure the memorial is made safe in accordance with the guidance issued by the National Association of Memorial Masons (NAMM) and the British Standards BS8415 (details of which can be provided on request).

IMPORTANT NOTICE UNSAFE MEMORIAL

It is with regret that we must inform you that this memorial has been inspected and has been found to be unsafe. Please do not touch or interfere with it in any way.

The memorial can only be repaired by an approved mason.

Cranleigh Parish Council is attempting to contact the owner of the grave.

For further information please contact:

Office hours:

IMPORTANT SAFETY NOTICE

Memorials in this cemetery may be unsafe.

Cranleigh Parish Council will be commencing inspections in the near future to ensure your continued safety within this cemetery. The Parish Council hope that you will follow this simple check list to enjoy a safe visit.

Do not

- Lean on a memorial.
- Pull oneself up on a memorial after tending to a grave.
- Climb on a memorial.
- Use a memorial for support.

Stay safe keep to the footpaths, if possible avoid walking between memorials and ensure children are supervised at all times.

Where memorials are found to be unsafe Cranleigh Parish Council will take steps to make them safe, this will involve temporary make safe arrangements, setting memorials into the ground or, where necessary laying them flat onto the ground to prevent a genuine hazard to public safety.

Should you have any concerns about the Council's safety policy or if you would like further information, please contact:
